

# Refurbishment & Restart Project MILESTONE Achievement

<b>Milestone Title</b>	<b>Production of First 10,000dmt Concentrate for Shipment</b>		
<b>Milestone Date</b>	28 January 2018	<b>Milestone Time</b>	-
<b>Location</b>	Concentrator		

### Milestone Description

The first full shipment of 10,000 dry metric tonnes (dmt) of concentrate will be shipped in February. The 10,000<sup>th</sup> dmt was produced on the 28<sup>th</sup> January.

The achievement of this milestone is not just a measure of the cumulative production since the plant commenced operation, but also of the solid ramp-up performance of the mine and plant, particularly in January. This included safe completion of a planned mill shut-down in the middle of January and an excellent start-up after the mill outage.

Well done to everybody for the achievement of production of the first 10,000dmt of concentrate.
